To whom it may concern,

It is an immense pleasure to be writing the Letter of Recommendation for Prem Khanvilkar. He has worked in Bifrost EdTech for over 8 months. He is an exceptionally enthusiastic volunteer from the start. He was one of the most hardworking members of the team, always available for all interns at the company to ask queries or file any complaints.

He is also incredibly understanding and empathic as a person. He is highly skilled at solving said disputes and his experience in managing hundreds of people and their conflicts over the last couple of months has made him amazing at recognising not only the defaulters but also true talent. He honed these skills by taking hundreds of interviews and picking out some of our best team members. He is also a highly effective and loved leader, his team has been one of the most cooperative.

One major quality that makes Prem shine brighter than the rest is his attention to detail and respect towards the legalities and proceedings within the organisation. He has demonstrated a keen eye for detail by drafting and overseeing legal documents, including Memorandums of Understanding (MoUs) for the Internship department. These documents were essential in solidifying partnerships with external organizations, strengthening our internship program, and providing unique opportunities for our students.

While Prem is beloved by all, he also understands where and when to draw boundaries. He excels at maintaining strong professional relationships with his peers and interns. His role throughout his tenure was multifaceted, encompassing various aspects of HR management, leadership, and strategic development.

ARJUN CHOPRA
CEO- BIFROST EDTECH.
